Art Unit: 3751

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17 and 18, drawn to a method of dispensing fluids, classified in class 141, subclass 1.
- II. Claims 1-16, drawn to an apparatus for dispensing fluids, classified in class 222, subclass 519.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as placing the container in a ventilation air duct for a building, rotating the head and allowing air drawn through the air duct to remove the liquid in the container for aroma therapy and not requiring the method steps of forming a hole in an air line and threadably inserting the nozzle into the hole.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Mr. Gene Scott on 10/8/2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3751

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Casimer Jacyna whose telephone number is 703-308-1508. The examiner can normally be reached on Tue. thru Thu. 9AM-8PM, Fri. 7AM-1PM.
